

Introduction to the Post-2015 toolkit

WaterAid's *Post-2015 toolkit* is designed to help you call for a bold and ambitious new development framework that unifies poverty eradication and sustainable development and delivers our vision of a world where everyone, everywhere has access to safe water, sanitation and hygiene (WASH) by 2030.

The briefing materials contained in the toolkit can be used for national, regional and international advocacy efforts, or adapted as appropriate. They will be most useful for those engaging in post-2015 conversations and consultations with contacts in the UN, national governments, civil society and the private sector.

The toolkit includes briefings on the process of deciding the new framework, WaterAid's demands, and the importance of WASH in eradicating poverty and promoting sustainable development. These can be used together or individually as standalone briefings on particular issues.

This is the second version of the toolkit, produced in August 2013. To download updates as they are published, please visit www.wateraid.org/post2015

Toolkit contents

- A vision for WASH post-2015
- Building the post-2015 framework
- WASH and poverty
- The economic case for WASH
- WASH and health
