How to reduce the risk of infection in factory work

Frequently wash both hands with soap and water for at least 20 seconds:

- Before and after work.
- Before eating and touching your face and nose.
- After using the toilet or touching dirt, dust, fluids and frequently touched surfaces.
Respiratory hygiene

Coronavirus (COVID-19)
How to reduce the risk of infection in factory work

- Cover your nose and mouth when you cough or sneeze.
- Use a tissue and dispose of it in a closed bin, or sneeze into your elbow. Then wash your hands with soap.
- Wear a mask in public.
Coronavirus (COVID-19)

How to reduce the risk of infection in factory work

- Avoid close contact.
- Maintain at least 2m distance when working in fields and factories (on the production line and in the canteen).
- Avoid group gatherings, stagger lunchtimes.
- Use non-contact greetings.

Physical distancing
Clean surfaces

Coronavirus (COVID-19)
How to reduce the risk of infection in factory work

Regularly clean sanitation facilities and frequently touched surfaces with disinfectant including door handles, mobile phones, hand rails, toilets, taps and drinking fountains.
Coronavirus (COVID-19)

How to reduce the risk of infection in factory work

- If you feel unwell, stay at home.
- If at work, go to a designated isolation room and notify a manager. Seek immediate medical attention.
