Translating disability inclusive WASH policies into practice: lessons learned from Cambodia and Bangladesh

Jane Wilbur, Chelsea Huggett, Pharozin Pheng, Mahfuj-ur Rahman, Adam Biran
London School of Hygiene and Tropical Medicine and WaterAid

Background

15% of the world has a disability1

- Across 34 countries: people with disabilities are more likely to live in households without access to basic water and sanitation than people without disabilities2
- Progress has been made in tackling discriminatory WASH legal frameworks, but implementation remains a challenge3
- Few efforts to evaluate or document national policies on disability inclusive WASH
- No systematic learning to draw together experience from different countries, derive elements of best practice and identify gaps in provision

Research aim, objectives

Research aim: To help improve disability inclusive, gender sensitive WASH policy making in LMICs through policy and practice guidance for governments

Objectives across Cambodia and Bangladesh:

1. Document what WASH policies are in place, and which of these are disability inclusive
2. What are the desired outcomes for women and girls with a disability and female carers within the policies?
3. How are these disability inclusive WASH policies implemented?
4. What are the gendered outcomes for people with a disability and their female carers?
5. Identify and document key enablers and bottlenecks for implementing disability inclusive WASH
6. Draw out lessons for best practice and synthesise as draft guidelines

Study sites

Cambodia

Bangladesh

Reasons for selecting Cambodia and Bangladesh as the case studies:

- Governments are committed to disability inclusive WASH, and there are promising examples of attempts to mainstreaming it in policies and practice exist, but gaps remain4
- WaterAid also has excellent relationships with national policy makers in these countries and are advising them on how to mainstream disability inclusive WASH services
- The government’s experiences of putting disability inclusive policies into practice reflects those of other LMICs5

Methods

Desk review of disability inclusive WASH of policies and evaluations

- National stakeholder review workshops
- National stakeholder framing workshops
- Qualitative data collection with women and men with disabilities and their female carers
- Key informant interviews (national, district government, implementers, disability organisations)

Sector strengthening approach

Cross sectoral but disability centred

- Research team includes people with disabilities, LSHTM, WaterAid
- LSHTM will train and coach the team to conduct ethical research with people who have a disability
- Disability Persons organisations, service providers and networks
- The UN Partnership on the Rights of Persons with Disabilities
- WASH implementing organisations
- Local and national governments

Key deliverables

- Literature review for Cambodia and Bangladesh
- WASH related experiences of women and men with disabilities and their female carers captured visually
- Disability inclusive WASH policy and advocacy brief for Cambodia and Bangladesh
- Peer reviewed publications of fieldwork findings
- Model WASH policy document, guidance, and practical tools on how to mainstream gender sensitive disability inclusive WASH in practice

Creating change within the SWA Building Blocks

- An assessment of the extent to which sector policies and strategies are disability inclusive in Cambodia and Bangladesh
- An assessment of meaningful participation of persons with disabilities in dialogue around service delivery and sector learning

- Supporting people with disabilities as researchers, advocates and influencers
- A review of the capacity of institutions to fulfil sector roles and responsibilities for disability inclusive WASH services at scale
- Development of guidance and tools to facilitate disability inclusive WASH services
- Contribute learning to the UNPRPD’s global community of practice on supporting policy change and systems strengthening for disability inclusive development

Sector financing

- A multi-stakeholder platform for sector dialogue and learning on disability inclusive WASH

Progress made (September – December 2019)

- Research designed collaboratively
- Ethics approval granted by the London School of Hygiene and Tropical Medicine. Application for ethics approval submitted to Bangladesh Medical Research Council and Cambodia’s National Ethics Committee for Health Research
